

Exercise 1: Using LLMs for Content Analysis

Overall Performance of RoBERTa Models

- How well can LLMs
 - Label instances?
 - Create training data for training models?
- Part 1: use LLMs to generate training data
- Part 2: train models on this data
- Part 3: use LLMs to directly label data (zero vs. few-shot)

Exercise 2: Auditing the Values of LLMs

- How well can LLMs encode world values?
- Prompt LLMs to answer the world values survey (and others?)

In Germany getting a divorce is never justifiable

- Part 1: get LLMs' answer on different values across different countries and languages
- Part 2: Compare against survey responses

Argentina

Do you personally believe that _____ is morally acceptable, morally unacceptable, or is it not a moral issue?
